

YANGON HASH HOUSE HARRIERS

2017 HASH STATS

Here it is - the must-see, super-doooper, latest Hash Stats. Apologies in advance for any cock-ups. If you spot any errors please contact **BoBo** at the earliest opportunity.

Note: For reasons of space, stats are only published only for "regular" Hashers. For the purposes of these stats you are deemed to be a regular if you have (a) run a cumulative lifetime total of 10 or more runs with the YH³ and have run at least once in 2017; and/or (b) acted as a Hare during the period 2016 to 2017.

Table 1 lists the total Runs attended in 2017; the date of the first and last Runs in 2017; the percentage of runs completed in 2017 and the Lifetime Grand Total of all Runs attended since the Runner's first YH³ Hash. Hashers are sorted in alphabetical order.

Table 2 lists the date of the very first and last YH³ Runs ever attended; the percentage of all runs attended since the date of the Runner's first Hash; the total number of Runs Hared in the two-year period 2016 to 2017 and the date when the Hasher last Hared.

Lowlights:

- There were 53 Runs held in 2017 (thanks to a Hangover Run following the Outstation Run). The average number of Hashers per run was 44.3. The maximum attendance was 93 on the Red Dress Run, Run 1455 held on 25 Nov. This speaks volumes about the dress sense of Hashers.
- 475 different Hashers ran with the YH³ in 2017. That's an awful lot of names to have to try and remember! 170 of these were considered as "regulars" for the purpose of these statistics (see above for the definition of a "regular").
- Top of the pile in terms of the maximum number of runs completed with the YH³ is **Bob BoBo Thomas** who has now logged a total of **845** Runs. He has run 81% of all possible runs since his first run in May 1998 - which only goes to prove what a sad git he is!
- Number 2 in the run stakes is Midgie **Raza Gaha Hasha** who has officially racked up **764** Runs since September 2000 although, for many years now, he has not actually run on any of the Runs for which he has been credited - he says he was too busy guarding the beer truck! And who can argue with that?
- Third is Ohn Tin Oo better known as **Gigolo Joe** who has **541** Runs to his credit since he first started Hashing in May 2001.
- Other Hashers worth noting include Fenton **Don't Call Me Shirley** Holland, who has logged up a grand total of **450** Runs since he first started hauling his sorry arse around the 'Goon in September 1993; Cam **Square Root Sabo** with **440**; Jamie **Iron Maiden**

Humphries with **439**; Terry **RoadRunner** Howe with **419** Runs since August 1990; and **Diarrhoea** with **412** Runs.

- The keenest Hashers in 2016 were **Raza Gaha Hasha** - 53 Runs (**100%**), **Diarrhoea** - 46 Runs (87 %) and **Sew Sew Scandalous** - 32 Runs (60%).
- The man who has been running around the 'Goon for the longest time and heads the geriatric stakes is Terry **RoadRunner** Howe who first ran in August 1990.
- Others who have managed 20+ years of Hashing here include: Steve **WeedWanker** Lanjouw who first hit trail on 13 Jun '92; Suz **Juicy Sushi** Loewecke On Trail since 11 Jul '92; Choo **Insituasian** Phuah started on 8 August '92; and Fenton **Don't Call Me Shirley** Holland on 11 September '93.

Notes:

1. Sadly, our records are not always complete, especially for the early years of the YH³. Totals may therefore be understated in some very occasional cases.
2. The records are compiled from the registration books. Illegible scribbblings and the sole use of first names often make it difficult to know to whom the run should be credited. People also occasionally forget to sign in/pay their dues. On rare occasions **BoBo**'s personal memory has been used to supplement the record. Make sure you writing is **legible** if you wish to ensure your records are correct.
3. Generic signings, such as "*Hasher and Family*" makes it difficult to know which of the family members actually took part. Again, educated guesswork has often been used, but ultimately certain members will not be credited with runs if the evidence is indecisive.
4. All members are encouraged to check that their records are correct. It is probably easier for you to decipher/recognise your own thumbprint/cross/signature or cipher in the books than it is for anyone else. So please ask **BoBo** to see the books if you think runs have not been credited to you.

Table 1 - 2017 Stats sorted by Runner in alphabetical order

Hare Statistics

‡The Hare Statistics are presented for a two-year period (2016 and 2017) because the irregular nature of Haring can make the statistics in any one year heavily skewed.

In the table you might notice that people have been credited with fractions of a run. How can this be, you might ask yourself? On the other hand, you might not give a toss. However, for the purposes of this table, Hares are only credited with the fractions of runs commensurate with the number of Hares that laid them. Thus, if a Hasher sets a trail all alone, he or she will be credited with laying one, whole Run. If two Hashers laid a trail then they will each be credited with half of a Run. If three Hashers laid a trail then they will each be credited with $\frac{1}{3}$ Run, with 4 Hares - you get a $\frac{1}{4}$ Run, etc.

- The Hare king, by a long, long way is **Diarrhoea**, who set 4.6 Runs over the last two years (and actually laid or helped lay trail on 11 different Runs!!!)
- The runner-up was **Ain't Ze Bush** who set 4.3 Runs and turned out on 10 separate occasions.
- Of the 170 "regular" Hashers in these Stats, only **50**, have managed to set at least 1 Run in 2 years ($\frac{1}{2}$ a Run per year) while 63 Hashers have not managed to set any Runs whatsoever. How many Hashes did you set????

Table 2 -2016/2017 Hare and Total Run Stats (in alphabetical order) ‡

Postscript

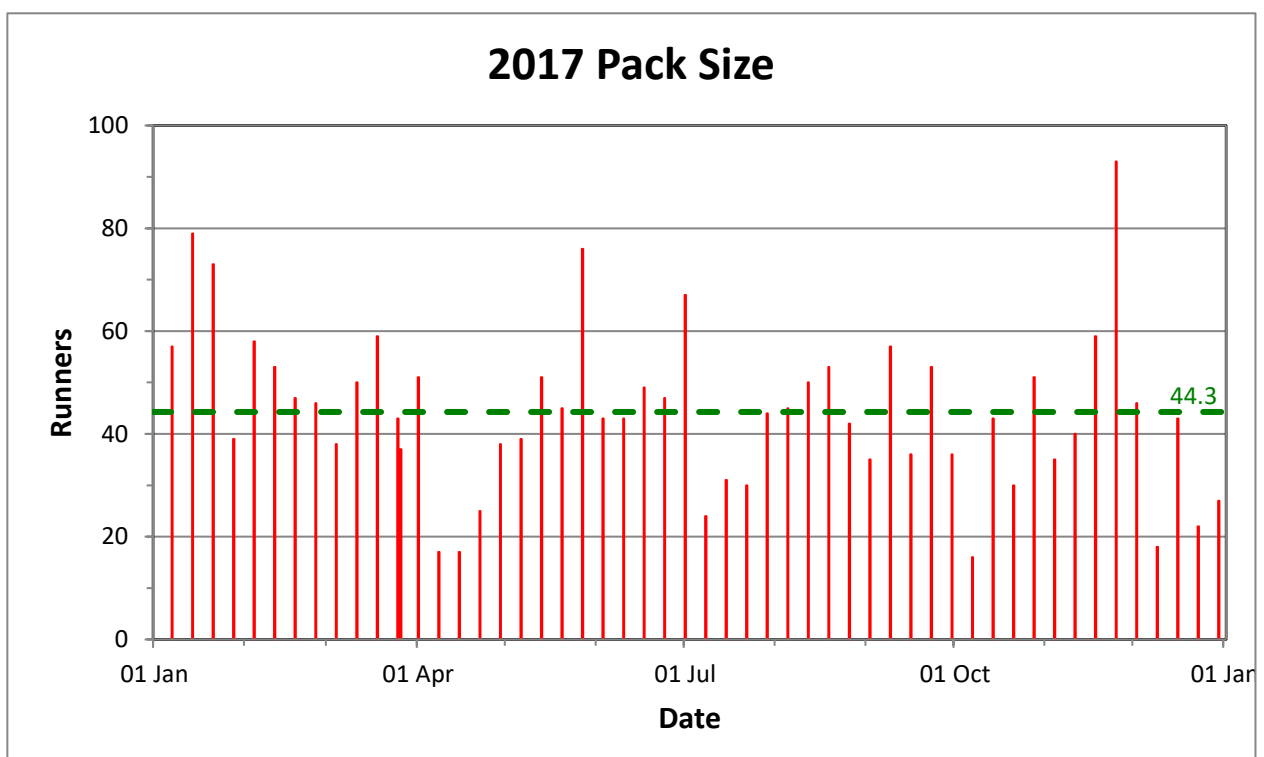

There are 170 "regular" Hashers listed in these Hash Stats. Now answer this High School question: If it takes two Hashers to lay an average trail and there are 52 trails in a normal year, how many Hashers do you need in the kennel if nobody has to help spread paper more than just once per year? Answer: 104, i.e. a lot less than the number of "regular" Hashers in the YH³.

So why is it so difficult to find Hares every week? Is littering the countryside with your best mate once-a-year too much to ask? It obviously is, judging by the Stats!! Put it another way (to labour a point) if you and one co-Hare lay a trail once per year, you will be credited with $\frac{1}{2}$ a Run per year and thus you will clock up a total of 1.0 in the Hare stats over a two year period. That should be the absolute minimum expected but only 50 people managed it. What a piss poor effort that is by everyone else.

QUESTIONS

HOW
MANY PEOPLE HAVE
NOT HARED A RUN IN
THE LAST TWO YEARS?
WHY HAVE THEY NOT???
SHOULD THIS BE ALLOWED?
CAN YOU FIND OUT WHO THEY ARE?
CAN YOU PERSUADE THEM TO CHANGE THEIR WAYS?

Do your bit for the Hash - set a Run!

And now for something completely different . .

Muslim suicide bombers in Britain are set to begin a three-week strike on Wednesday in a dispute over the number of virgins to which they are entitled in the afterlife. Emergency talks with Al Qaeda have so far failed to produce an agreement.

The unrest began last Tuesday, when Al Qaeda announced that the number of virgins a suicide bomber would receive after his death, would be cut by 25% this February from 72 to 54. A spokesman said increases in recent years in the number of suicide bombings, has resulted in a shortage of virgins in the afterlife.

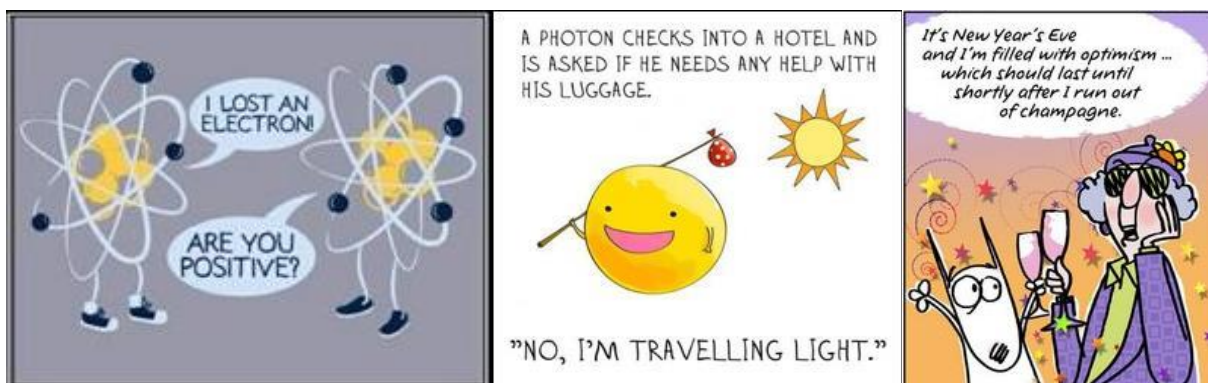

The suicide bombers' union, the British Organization of Occupational Martyrs (B.O.O.M) responded with a statement saying the move was unacceptable to its members and called for a strike vote.

General Secretary Abdullah Aloud Bhang told the press, "Our members are literally working themselves to death in the cause of Jihad. We don't ask for much in return but to be treated like this is like a kick in the teeth".

Speaking from his shed in Tipton in the West Midlands, Al Qaeda chief executive Aisheet Mapants explained, "I sympathize with our workers concerns but Al Qaeda is simply not in a position to meet their demands. They are simply not accepting the realities of modern-day Jihad in a competitive marketplace. Thanks to Western depravity, there is now a chronic shortage of virgins in the afterlife. It's a straight choice between reducing expenditures or laying people off. I don't like cutting benefits but I'd hate to have to tell 3,000 of my staff that they won't be able to blow themselves up."

Spokespersons for the union in the North East of England, Ireland, Wales and the entire Australian continent stated that the change would not hurt their membership as there are so few virgins in their areas anyway.

According to some industry sources, the recent drop in the number of suicide bombings can be attributed to Rosie O'Donnell and Maxine Waters; many more Muslim Jihadists now know what a virgin looks like and have reconsidered their benefit packages

I was walking down the street when I was accosted by a particularly dirty and shabby-looking homeless man who asked me for a couple of dollars for dinner. I took out my wallet, extracted ten dollars and asked, "If I give you this money, will you buy some beer with it instead of dinner?"

"No, I had to stop drinking years ago, " the homeless man replied.

"Will you use it to go fishing instead of buying food?" I asked.

"No, I don't waste time fishing," the homeless man said. "I need to spend all my time trying to stay alive."

"Will you spend this on hunting equipment?" I asked.

"Are you NUTS!" replied the homeless man. "I haven't gone hunting in 20 years!"

"Well," I said, "I'm not going to give you money. Instead, I'm going to take you home for a shower and a terrific dinner cooked by my wife."

The homeless man was astounded. "Won't your wife be furious with you for doing that?"

I replied, "Don't worry about that. It's important for her to see what a man looks like after he has given up drinking, fishing and hunting."
